Job Description

Additional Information About the Role

Remote opportunity! (Must live in the metro St. Louis area). There will be onsite meetings required.

BJC is hiring for a Sr PD & C Engineer. We are looking for a Mechanical or Electrical Engineer from the construction industry. Healthcare design experience a plus.

Overview

BJC HealthCare is one of the largest nonprofit health care organizations in the United States, delivering services to residents primarily in the greater St. Louis, southern Illinois and southeast Missouri regions. With net revenues of \$6.3 billion and more than 30,000 employees, BJC serves patients and their families in urban, suburban and rural communities through its 14 hospitals and multiple community health locations. Services include inpatient and outpatient care, primary care, community health and wellness, workplace health, home health, community mental health, rehabilitation, long-term care and hospice.

BJC is the largest provider of charity care, unreimbursed care and community benefits in the state of Missouri. BJC and its hospitals and health service organizations provide \$785.9 million annually in community benefit. That includes \$410.6 million in charity care and other financial assistance to patients to ensure medical care regardless of their ability to pay. In addition, BJC provides additional community benefits through commitments to research, emergency preparedness, regional health care safety net services, health literacy, community outreach and community health programs and regional economic development.

BJC's patients have access to the latest advances in medical science and technology through a formal affiliation between Barnes-Jewish Hospital and St. Louis Children's Hospital with the renowned Washington University School of Medicine, which consistently ranks among the top medical schools in the country.

PD&C provides professional support for system-wide comprehensive strategic facility plans for the various campuses within BJC. Providing integrated design planning the group brings process excellence and standardization in planning including a reliable estimating, scheduling and cost forecasting system. They serve as educators for their customers bringing strong resources to the system, and reviewing all efforts with an eye towards environmental impact. The department provides the necessary selection, contracting, supervision, management and leadership of system-wide program management services for capital design and construction projects. They are accountable for developing, implementing and maintaining the policies, procedures and systems supporting capital projects executed to improve patient outcomes and satisfaction and increase the productivity and financial results of all BJC facilities. The department also provides leadership and technical direction in the development of program control, benchmarking and measurement standards that meet the demands of the strategic needs of BJC HealthCare
