Description

Founded in 2018, Missouri Cobalt ("MOCO") is a rapidly growing start-up and plays a key role in the domestic energy transition to electric vehicles. As the only vertically integrated producer of Cobalt and Nickel in the United States, Missouri Cobalt is strategically positioned to supply clean, domestic, and ethically sourced battery metals for lithium-ion batteries, which power electric vehicles and consumer electronics. Specifically, the Company focuses on extracting, recycling, and processing strategic metals for use in the high-performance battery market. Missouri Cobalt owns a historic mine in Fredericktown, Missouri, and is building a hydrometallurgical processing facility with the ability to convert both mined minerals and recycled battery material into salable battery metals.

Requirements

Education and Experience:

- Bachelor's degree in electrical engineering, or an industry-related field of specialization
- Specialization in process plant electrical, control, and instrumentation systems preferred.
- At least 5 years of experience in process plant electrical, control, and instrumentation engineering or a related field
- Proficiency in project management and Statistical Process Control (SPC) software
- Extensive industry-specific electrical and process control knowledge

Skills/Abilities:

- Excellent verbal and written communication skills, with proven negotiation skills
- Excellent interpersonal and customer service skills
- Excellent organizational skills and attention to detail
- Excellent time management skills with a proven ability to meet deadlines.
- Strong analytical and problem-solving skills
- Ability to prioritize tasks and delegate them when appropriate.
- Understanding of business and management principles
- Thorough understanding of materials and supplies used in the company.
- Proficient with Microsoft Office Suite or related software

Summary

Benefits: Missouri Cobalt offers a competitive salary, bonus, and comprehensive benefits including medical coverage, prescription drug reimbursement, dental coverage, vision coverage, flexible spending accounts, disability coverage, life insurance, a savings and retirement plan w/company match, adoption assistance and an educational assistance program.
